

ALMR User Council
Active Issues and Risks Log

Active Issues									
No.	Initiated	Research	Approval	Title	Description	Status / Actions	Opened	Targeted / Closed	
56	Tim Woodall	Casey Borg	UC	Busies	OMO and SMO will collaborate to develop a standard on what is an acceptable number of busies for both day-to-day and emergency operations, and what is an acceptable duration of length for a busy during those times. OMO will benchmark the data by contacting other staes with trunked radio systems.	Update 1/2/2008: The OMO/PMO is researching other state LMR systems to see what standards they use. The PMO had only received four responses on this issue and did not expect to receive any more. Del stated he would do some further research while at the IWCE and see if he could gather more data; he felt four agencies was insufficient to base a standard off of.	2-Jan-08	31-Mar-08
