Alaska Land Mobile Radio
Virus Protection Policy

1. Applicability

This policy applies to the Systems Management Office (SMO) and defines required virus protection configurations that shall be used on the Alaska Land Mobile Radio (ALMR) Communications System and all subsystems running a Microsoft Windows or Linux Operating System. Any substantial revision or update of this policy must be approved by the User Council.
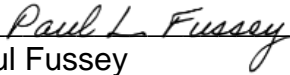

2. Policy

All information systems utilizing a Microsoft® Windows or Linux® Operating System will be installed with the McAfee® ePolicy Orchestrator (ePO) agent.

The SMO shall ensure McAfee® ePO agents are installed and centrally managed from the ALMR McAfee® ePO server.

3. Procedures

    a. All ePO agents shall be configured to meet the following requirements:
- ePO agents scan entire system at least weekly.
- ePO agents scan all files upon manual or automatic access.
- ePO agents automatically download and install updates from the ePO server when available.

    b. The SMO will ensure that the ePO server:
- Receives regular AVS updates from the Motorola™ Systems Support Center
- Is configured to manage each ePO agent installation on the ALMR System

4. Effective Date. This policy shall become effective upon signature and shall remain in effect until rescinded. The policy shall be reviewed periodically and updated, as required.
