

**User Council Action Items Status
from May 3, 2023**

1. Fire Marshal Kyle Green requested the ALMR offices look at the feasibility of adding additional metrics slides which present the push-to-talks and the busies by region.

Update: Current Genesis software cannot support the request. Genesis has been asked to develop an algorithm for this function, but it is unknown how long this will take. UC members were encouraged to provide feedback for Genesis for consideration in getting this accomplished. **(CLOSED)**

2. Mr. Scott Stormo requested two new items be added to the Active Operational Issues on the Issues and Risks Log regarding failed power lines at the Saddle Mountain and Heney Range sites. **(CLOSED)**
